

ROBERTSON

WALLS & CEILINGS

"building the highest standards"

Insights - Q1

Quarter 1 - 2016

Featured Projects

NORDSTROM VANCOUVER

In Q4 of 2015 RWC completed the Nordstrom flagship store at 799 Robson Street in Vancouver. The project consisted of 232,000 sq.ft of floorspace. Within this space is 90,000 sq.ft of suspended drywall ceiling clouds completed with a Level 5 finish. There were a significant number of owner-driven changes that increased the scope of work, including the addition of 26 vendor stores within the retail space, with no change to the grand opening date! We are proud to be a key team player in the success of this project.

GRANDVIEW HEIGHTS AQUATIC CENTRE

RWC completed this project in late 2015. Situated in the fast growing community of South Surrey, this state-of-the-art facility will be a legacy for years to come. This project featured 38,000 square feet of tectum acoustic panels for the ceiling finishes, and 4000 square feet of Cellacoustic wall

panels. Given the complex nature of this project, RWC prefabricated the ceiling panels for a reduced install time on site. This was a huge movement forward on the scheduling of this project.

What's New at RWC!

Introducing James Ram!

RWC is pleased to announce that James Ram has joined our team. James' diverse experience in the industry is a key asset to our Pre-Construction department. James will be responsible for engineering, CAD drawings, evaluating suppliers and preparing the projects for the Project Management team.
