Re: Robertson Walls & Ceilings – Surrey Main Works Yard Project

To whom it may concern:

It is with pleasure that we provide this letter of reference for Robertson Walls & Ceilings associated with their work at the Surrey Works Yard project.

This project involved the redevelopment of the City's existing Works Yard and Operations Centre which consisted of 3 buildings, a 5 story 8800sqm administration building, a 1300sqm warehouse building, and a 4400sqm fleet maintenance work shop. Robertson Walls & Ceilings provided steel stud, drywall, acoustic ceilings, and architectural wood ceilings for all of these buildings. At some points of this project RWC was working in all 3 buildings simultaneously which highlights the depth and capacity of the organization.

Their field staff were knowledgeable, proactive, and willing to work with other trades which goes a long way on a large project. Robertson's office staff provided the necessary support to their field staff and were timely with submittals, change order pricing, and close out documentation. They brought a level of professionalism to this project and were a pleasure to work with throughout the process.

The most challenging aspect of this project for RWC was the main architectural feature consisting of cedar slat wood ceilings at the entrance and to the soffit of the 5 story open stair case up the middle of the building. RWC performed this scope with a high level of craftsmanship and were a major contributor at the detailed review and coordination meetings the beginning which ensured the process ran smoothly. This really highlights their willingness to cooperate and assist in the constructability aspect and provide solutions so the project could be delivered on schedule. RWC had the capacity and capability to deliver to our expectations while never compromising quality.

As a result of this project, we would recommend Robertson Walls & Ceilings to any potential client and would not hesitate to work with them again

Regards,

Shawn Crichton
